

## Product overview for the production range Of 3D-thermoforming doors

### **Silicone and natural rubber Membranes**

The Gmatick membranes are used now for more than 20 years in all types of membrane presses worldwide. Our constantly further developed, high quality membranes are made of silicone or natural rubber they characterized by your always consistent high quality and very high cycle times.

### **Paternoster**

The foil storage Paternoster is suitable to use for the storage of all 3D-films, it is used as a high storage at the membrane press or as a space-saving storage solution for the 3D foils.

### **PIN System**

for fast and easy production of 3D furniture doors.  
The Gmatick pin replaces the conventional distance plates (JIG), thereby you save a lot of production time because the manufacturing, storage and search of templates is completely eliminated.

### **Gmatick power cleaning- PAD**

With the new Gmatick Power PAD you clean the over-spray from your 3D-furniture doors in a simply, fast and easy way, without any chemical liquids, perfect clean surface is the result. Save time and money

### **Silicone round seal**

Is the silicone seal at the membrane press broken you can hear it because the sound is very noisy, the exchange of that silicone seal is done very easily in a very short time.

## Product overview for the production range of 3D-thermoforming doors

### **GTS- Gmatick Trimming Station**

With a Gmatick trimming unit GTS you cut the 3D-foils directly at the Press on the needed length. The film is coming from the Paternoster or foil magazine and you cut it very easy and fast with that unit.

### **Ionization unit**

The removal of electrostatic charges through the ionization rod of the films and furniture fronts prevents the sticking of any dirt and dust, so the problem with dirt inclusions has thus been avoided.

### **TK1 das Schneidmesser für 3D-Möbelfronten**

The TK1 is the Special knife that flush cuts the excess foil sections on edge of the furniture doors to 100%.

### **Roba Profi Clean**

Backside cleaning of thermo foiled doors. Cleaning of laminated furniture panels. The Roba Profi Clean as through feed solution guarantees high productivity with best cleaning results.

### **Turn over device**

the turn-over table flips the whole carpet of workpieces by 180°, than it is fast and easy to trim all doors.
