

Silicone and natural rubber Membrane

The Gmatick membranes are used now for more than 20 years in all types of membrane presses worldwide. Our constantly further developed, high quality membranes are made of silicone or natural rubber they characterized by your always consistent high quality and very high cycle times. We supplied on request all membranes immediately and if necessary we deliver the membranes by express service.

We offer the standard widths of 1700 mm, 1800mm and 2000mm (up to 36m long), in thickness the standard is 2,5 mm and 4mm for the natural rubber membranes and 3 mm for the silicone membranes. The special service from GMATICK is a fast and free of charge cutting of the membranes, we cut your membranes to your needed membrane-size. Our membranes are available from stock, for special applications we can offer special solution and sizes. Please send us your inquiry to office@gmatick.de

Our well-trained staff will offer then the correct membranes.

Silicone Membrane Type SM1

-colour of the SM1	white to translucent
-Surface	both sides smooth
-our standard width	1700mm and 1800mm
- Polymer type	Silicone
-Hardness	ca. 50° Shore -/+3°
-Thickness	3mm other sizes on inquiry
-Temperature range	-50°C to max. 200°C

Rubber Membrane Type RM2

-colour of the RM2	grey
-Surface	both sides smooth
-our standard width	1700mm and 2000mm
-Rubber	natural rubber
-Hardness	ca.42° Shore -/+3°
-Thickness	2,5mm and 4mm other sizes on inquiry
-Temperature range	-20°C to max. 130°C
