

## The TK1 is the perfect

## TRIMMING KNIFE for your 3D furniture doors

### Technical details:

The TK1 is the Special knife that flush cuts the excess foil sections on edge of the furniture doors to 100%. You use an 18mm standard blade in this Trimming knife, which clamped at a perfect angle in the knife-block. In this way we guarantee a perfect trim result. It is not possible to cut into the surface of the backside of your doors, in that way you have the benefit that the number of damaged doors is reduced a lot, and the knife is played by itself.

### Advantages:

- Perfect cut
- Save a lot of time
- no damaged doors anymore
- Cheap blades because that is local available in all countries.

### Scope of delivery:

1 knife shot block, 1 Allen key for changing knives and 10 PCs spare blades

There is also a special version TK1-SP for at least 45 mm wide parts as it occurs for example when sprouts doors and fronts with glass cut-out.
